

EMPOWERING YOUR DIGITAL TRANSFORMATION

Grabba enables secure and effective identification and data processing for individuals, businesses and organisations.

Technology

Transforming physical information into digital insights

Biometrics

Authenticating and validating biometric data

Identity

Efficiently securing identity based transactions and interactions

We listen.

Organisations are transforming to meet the rapid change happening in their environment. Grabba is at the forefront of empowering digital transformation and client enterprise growth with our mobile technology and innovative identity solutions.

First and foremost – we listen! Your organisation is unique and we are passionate about empowering your digital transformation. Built on a platform of mobility and available on the most popular operating platforms and systems, we guarantee a solution designed for your environment.

Security and Policing

Efficiently secure your borders, events and facilities. Empower law enforcement teams to efficiently process citizen interactions.

Retail and Banking

Offer customers better experiences, keep their identity and payments safe, and hold onto their loyalty for a lifetime.

Operations and Logistics

Optimise your operations, make predictive decisions, and deliver better economic, environmental and social outcomes.

We transform.

A fully integrated ecosystem

There are a plethora of technologies and products available in the biometric and biographic data collection marketplace. Grabba stands out because of our focus on intuitive and intelligent integration.

Grabba brings together the latest biometric identity authentication and data capture capabilities to create intuitive and reliable solutions – not only able to collect and interpret intelligent streams of data, but also to assemble components to quickly create new capabilities.

We execute with simplicity.

From securing borders across Europe, Asia and North America, to empowering retail commerce, Grabba brings efficiency to the customer experience. Removing delays when boarding cruise ships, to securing telecommunication sales, Grabba is at the forefront of Research and Development into the best identity technologies on offer.

Grabba offers these technologies in a solution designed to empower your organisation. Today Grabba integrates the latest biometric identification technologies, forging ahead to a universe where citizens take ownership of their own identity.

Grabba Features

Free SDK and drivers for all operating systems

Rugged construction

Easily upgraded to fit new smartphones (no need to purchase new Grabba units).

Built specifically for each use-case and requirement.

About Grabba.

Grabba enables secure and effective identification and data processing for individuals, businesses and organisations. As a trusted authority in identity technology Grabba is uniquely positioned to empower the digital transformation of the organisations it serves.

Since its inception in 2001, Grabba has grown a global network of engaged customers and partners who desired innovative mobile identity technology. Receiving recognition from many government security agencies over that time, Grabba established a strong footprint in Australia and the United States.

In 2017 Grabba was acquired by GJR Technologies, an Australian technology group led by an experienced team of global executives. The team share a passion for research and development, authentic customer engagement and leading edge technology innovation. Under their guidance Grabba has experienced rapid growth, strengthening its footprint into Europe and the Middle East.

In 2019 Grabba acquired Crystalaid, a complex microelectronics manufacturing company, bringing AS9100 certification to the GJR group

Today, in a world facing unprecedented security challenges, Grabba is helping people with safe and secure identity validation, forging ahead to a universe where citizens take ownership of their own identity.

Trusted by **1000+** international businesses

Grabba “gave our officers the capability to do law enforcement and biometric queries on a smartphone”. It is an “efficient device that officers on the frontline say is having an impact.”
